🐙 Github

Software Developer with hands-on experience in Next.js, TypeScript, React, MongoDB, MySQL, ConvexDB, building scalable UI/UX platforms. Strong in DSA, REST APIs, and real-time systems, with a focus on clean architecture and performance optimization..

Skills

- **Languages :** JavaScript, TypeScript, C++, SQL, Python, Go
- **Frontend :** ReactJs, NextJs, Tailwind CSS, CSS, Material UI, Framer Motion, Redux Toolkit
- **Backend :** Nodejs, ExpressJs, Flask
- **Database :** MongoDB, My SQL
- **Tools and Version Control :** Git, Github, PostMan
- **Concepts:** DSA, OOP, REST APIs, System Design (Basics), DBMS, Networking

Experience

Software Developer Intern [SketchUI Demo](#)
Sapmen C

*Sept 2025 – Present
(Remote)*

- Developed a real-time AI-powered UI/UX design platform using Next.js, TypeScript, and Convex DB, enabling end-to-end UI generation from sketches with sub-200ms latency.
- Optimized component rendering using memoization and dynamic imports, improving page load performance by 35 Percent.
- Currently working on client based project management system. Working on improving the UI.
- **Technologies worked with :** NextJs, TypeScript, ConvexDB, Tailwind CSS

Projects

Online Examination System

[Demo](#)

- Developed a full-stack Online Examination Platform with **role-based access** for Teachers and Students, featuring secure exam creation (**custom duration, timed auto-submit, refresh prevention**).
- Integrated **AI Powered Question Generator, real time chat system** between students and teachers, student's result evaluation with detailed analytics.
- Implemented scalable backend services and interactive frontend modules supporting **material upload/download, PDF export of AI-generated responses, email notifications**, and year-wise student management.
- Technologies used : *Reactjs, NodeJs, ExpressJs, MySQL, Socket IO, JWT, Framer Motion*

Phishing Website Detection Software

- Developing a web-based phishing detection system that identifies and classifies suspicious URLs or websites using machine learning algorithm : **Random Forest**
- Engineered and extracted key features from webpage URLs content—such as domain length, presence of HTTPS, special characters, and external link ratios—to enhance phishing detection model accuracy.
- Tested with vast datasets and achieved nearly **90 Percent accuracy**.
- Technology used : *Python, Flask, Reactjs, MongoDB, Jupyter Notebook*.

Education

Maulana Abul Kalam Azad University of Technology

Sept 2022 - July 2026

B. Tech. in Information Technology (**CGPA - 9**)

- Course work - Operating System, DataBase management system, Object Oriented Programming, Networking.

Achievements

-
- Secured **2nd Position** in inter college coding competition(November 2024)
 - Secured **3rd position** in inter college coding competition
 - Secured **global rank 2509** in leetcode weekly contest 477
